

My BOLD Cookie Goal!

Write your cookie box goal in the center of the Samoas® to track your progress!

There are 35 spaces on this Cookie Target, so you will need to use your math skills to figure out how many cookie boxes each space represents.

For example, if your goal is to sell **150 boxes**, you would take your goal (**150**) and divide it by the number of spaces (**35**) to figure out how many cookie boxes each space represents (**6**). So, for every 6 boxes of cookies you sell, you color in one section on the target!

Younger girls might want to ask an adult for help.
