Using Cheddar Up for Product Programs

Cheddar Up is the preferred option for troops to collect cookie revenue from parents. It’s also a recommended POS option for accepting in-person credit card payments from customers.

Get Started

For both Fall and Cookie programs, two collections will be automatically added to your troop’s Cheddar Up account to support both volunteers and entrepreneurs.

1 Collect Cookie Revenue

Everyone saves time when parents turn in product revenue online. Use this collection to have parents enter the amount collected and submit payment to the troop by echeck for only $0.45. Troops then withdraw funds to their troop bank account in time for the council’s ACH debit (allow at least two business days for echeck processing).

2 Collect at Point-of-Sale

Girls can easily accept in-person payments using this collection in combination with the Cheddar Up mobile app. It comes complete with cookie images and the ability to give credit to each girl. When used with Cheddar Up’s new card reader, you’ll have reduced fees of only 2.6% + $0.10.

Cheddar Up Point-of-Sale How-To

To start accepting point-of-sale payments from customers, download the Cheddar Up mobile app, log into your troop’s Cheddar Up account, and click on your POS collection.

1. Tap Point of Sale and add cookies to cart
2. Assign the sale to a Girl Scout
3. Select a payment method – cash or credit card
4. Swipe, scan or enter credit card info

Common Point-of-Sale FAQs

What are point-of-sale processing fees?
Exclusive to GSNorCal troops, when a troop is using Cheddar Up’s Bluetooth card reader, processing fees are only 2.6% + $0.10 per transaction. If a troop uses the scan card feature or enters credit card information manually, fees are 2.6% + $0.30. These fees are absorbed by the troop, by default, in accordance with GSUSA policies.

How do I purchase a card reader?
Simply to go https://swipe.cheddarup.com to purchase a card reader.

Do I have to purchase a card reader?
While using a Cheddar Up card reader is more efficient and, as a result, will likely result in more boxes sold in a shorter timeframe, you do have other options. Other options include entering the credit card number manually or scanning a credit card with a smart phone’s camera (available for embossed cards only).
