

Girl Scout Cooking Pizza Box Solar Cooker

Make a solar box cooker and cook something simple. To do this, make sure you have enough sunlight. Do not try this when the sky is cloudy or when the sun is low in the sky. Don't try to cook meat, fish, or poultry. This activity is also located in the [Junior Eco Camper Badge requirements](#).

You will need:

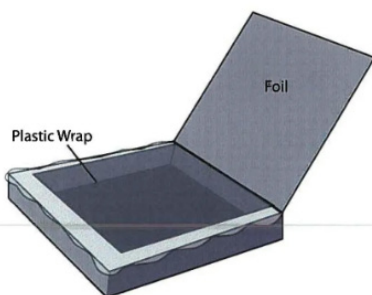

- Cardboard pizza box
- Plastic wrap
- Scissors
- Aluminum foil
- Clear tape
- Black construction paper
- Newspapers
- Wooden Spoon/Skewer

Step 1: Cut along three sides to make a flap in the lid of the pizza box.

Step 2: Cover the inside of the flap with aluminum foil.

Step 3: In the box opening where you cut the flap out of, wrap plastic sheets around it so it looks like a window.

Step 4: Inside the box, tape black construction paper along the bottom. Roll up sheets of newspaper to create a border around the cooking area.

Step 5: Take your solar pizza box over to a sunny spot

Step 6: Use the wooden spoon or skewer to prop open the flap at an angle so it faces direct sunlight.

Step 7: Use mittens or a towel when you lift your dish out of your solar cooker.
